

Sample Rescue Aspirin & Epinephrine Use Policy

Purpose:

The use of Aspirin and Epinephrine is recognized as an intervention that will help save lives. The (*service name*) Rescue recognizes the need for training and the need to maintain Proficiency in the recognizing of Cardiac and Anaphylactic symptoms. In order to provide the highest quality patient care when called upon to use these medications.

Policy:

Those EMT's trained in the administration of Aspirin & Epinephrine will review the use requested by the Physician Medical Director (PMD). The use administration of Aspirin & Epinephrine and counter indications will be reviewed during the Month of March EMT training.

A list of names of those EMT's who have successfully demonstrated their competency skills in the use of Aspirin & Epinephrine will be given to the PMD within 30 days following the competency training and a copy of that list will be placed in the EMT service files.
